

## **IDS Announces the Appointment of PT Geoservices as Authorised Representatives in Indonesia**

### ***Turning data into Knowledge***

March 2017

**IDS** is proud to announce the appointment of **PT Geoservices** as its exclusive representative for the Indonesian market for its range of reporting and analytic products and services.

IDS Director, Douwe Franssens, firmly believes that this is a good time for IDS to explore and develop the Indonesian market; “As resources become more scarce, the need for performance related operational reporting capabilities and associated analytics will enable operators, service companies and rig contractors to compete in the local and international markets where continuous performance is essential”.

PT Geoservices Director, Peter Pramana, stated “IDS with its Anova Analytics, is the best application for our Indonesia clients as it allows them to analyse their data and make better decisions for their next drilling program. With this downturn, drilling performance and efficiency have become increasingly important and are now the primary objectives for most. An increasing number of operators are turning to the IDS solution to help them achieve these objectives.”

### **About IDS**

IDS has been providing web-delivered operational reporting solutions to the upstream oil and gas industry for over twenty years. Drilling contractors, operators, and service companies utilise the data management capabilities to obtain crucial insight into their company’s operational performance through pre-configured dashboards and advanced benchmarking visualisations. Utilising the skills of industry-experienced engineers in conjunction with advanced IT proficiencies, IDS continues to be at the very forefront as an operational reporting and data analysis provider. As a strong advocate of data integration, IDS’s web-delivered solutions minimise data entry while maximising data integrity, enabling companies to increase operational efficiencies.

### **About PT Geoservices**

Founded in 1971 to offer services to the mining industry, PT Geoservices (Ltd) evolved into a fully integrated exploration services company. Employing more than 600 people, some of which are expert in specialized fields from several foreign countries, the company is offering in mapping surveys, geology, geophysics, downhole measurements, borehole drilling, laboratories analysis, and cargo superintending for quantity and quality. PT GEOSERVICES is a limited company and 100% owned by Indonesian citizens, Durban L. Ardjo and H.L. Ong. They remain actively involved in its management. PT Geoservices has a solid base of expertise covering all aspects of the exploration and development of Indonesia’s oil, gas, coal, mineral, and geothermal industries. Originally providing field sampling and chemical analysis for the mineral industry, PT GEOSERVICES has diversified its services and broadened its client base.
